- Firebase
- Agile Methodologies

WORK EXPERIENCE

Mobile and Web Developer

Digi Power Co., Ltd | Myanmar   02/2022 – 02/2025

- Developed and maintained WB Work Day app using Flutter and Python REST APIs, automating business processes for 2,800+ users
- Led full development lifecycle from design and deployment to post-launch updates to ensure continuous improvement and bug fixes
- Implemented state management solutions (Provider, GetX) to optimize app performance, enhance responsiveness, and manage data flow efficiently
- Implemented app architecture patterns (MVC) for scalable and maintainable code
- Deployed apps to Google Play Store and Apple App Store, achieving successful launches with positive feedback from users and stakeholders
- Developed custom Odoo modules to enhance functionality and ensure smooth integration with Flutter apps using the Odoo REST API
- Collaborated with clients to gather requirements and deliver customized solutions on time
- Used Figma to prototype UI and mirrored pixel-perfect design into Flutter

Senior Mobile Developer (Part-time Remote)

OOAK Inc | Japan   09/2022 – 08/2024

- Developed e-commerce, POS, and chat apps with Flutter for Android and iOS, ensuring smooth user experiences
- Integrated Firebase for notifications, Pusher and Jitsi for real-time features, and Square and Stripe for payments
- Utilized MVC, MVVM, and Clean Architecture to develop scalable, maintainable, and reusable code
- Developed a Vue-based website for browsing SIM card options in Japan, enhancing user experience and accessibility
- Implemented custom UI components, improving app performance by 35% and improving user experience
- Managed the integration of Firebase with Flutter applications, optimizing data synchronization and increasing user retention by 30%
- Prioritized and resolved high-severity issues, ensuring continuous app stability and minimizing downtime

Myanmar Information Technology Co., Ltd | Myanmar

Senior Mobile Developer   10/2020 – 01/2022

- Collaborated with team of developers to reduce app load time by 40% through optimized code and efficient resource management
- Developed an e-commerce application using Flutter, integrating secure payment processing for seamless transactions

🧰 WORK EXPERIENCE

- Developed a CRM-based application using Ionic, enhancing customer relationship management features and mobile accessibility
- Built a COVID vaccine scheduling website with Angular, optimizing user scheduling
- Developed websites using Angular, Java Serverless, and MySQL, integrating payment systems like KPay, CB Pay, and 2C2P
- Led a team in developing a cloud-based HR solution, successfully deploying to 20+ clients and increasing user satisfaction by 35%

Mobile Developer   10/2018 – 09/2020

- Promoted to senior mobile developer position for expertise in mobile app development and consistent delivery of high-quality project
- Developed multiple applications for HR, students, government, and hospitals using the Ionic framework, enhancing user experience and operational efficiency
- Integrated Google Maps and Geocode API in the HR application, enabling users to view their current and desired locations for attendance tracking
- Successfully deployed the application on both the Play Store and App Store, ensuring accessibility for end users
